NUMBER 51.

THE STORM.

The Worst Ever Known in this

The Damages to Property Extensive all Along the Rio Grande Valley.

PARTIAL LIST OF DISASTERS

One of the worst sand storms that has eyer visited the Rio Grande valley and this city, commenced here yesterday afternoon about 6 o'clock and has continued all night and to day, increasing with

Outhouses are scattered in all direchouses and sashes are torn from their fastenings and are lying here and there, grand shape to its violence. many hundred feet from where they be long. Corners of brick houses are loosened and bricks are found scattered along the aidewalks. Wherever the storm could get a broad side sweep from the east, for it is a regular eastern buzgard of the worst kind, the navoc is terrible

blown into the building and broken into city. the very smallest of pieces. The plate glass in the dry goods store of B. Schus-

The stores on First street, where the storm is not interrupted, are great sufferers. Three large panes of giass at Farr's mest market fell into the build ing, scattering broken glass everywhere. At Grunsfeld's retail dry goods store and in the building occupied by Mandell Broe. & Co., several panes of glass are broken. Other stores have suffered

The damage on the Highlands is reported great, but the storm is so fierce that the reporter, who spent three hours in hunting up those who suffered, is able to give only a few of the losers. A big glass was blown in at the college building, while a window blind and win- ed with the ground and the losses will dow casing were blown off the ward foot up into the thousands. school in precinct 26.

Tin roofs appear to be the special vicoff, and is liable to come to the ground moment. The tip roof of the elecare blown away.

The windmill at M. Mandell's was blown into the Catholic church yard, and flagration. ington's was snapped off and carried a hundred yards away.

The chimneys on M. S. Otero's hand some new residence, in course of con-

struction, are scattered in adjacent vards. The fire walls of the San Felipe hotel are gone, and Billy Sanguinette's kitchen

The east side of John Jacoby's brick Ruby, also in the southern part of the of several thousand bricks was also leveled with the earth.

blacksmith shop lies a few hundred feet the loss of their corrugated iron roof, which was blown off.

The awning on Grunfeld's retail store swinging to and fro four panes of glass in the front window were broken.

About forty feet of fence at the scad inclement weather.

emy is down, and the public schools are closed this afternoon on account of the

No damage is reported at the Crystal lce company or at the Southwestern big ice and beer storage house, which was almost ready to be occupied and adjoining the brewery, was blown down and scattered over a block of ground. At Mausard's flour mills in the same vicinity the smoke stack was blown across the switch track of the Santa Fe road, breaking the telegraph wires in falling. The roof of the engine house is also dam aged. Mr. Mausard telegraphed immediately to Leavenworth, Kau., for a new smoke stack; the damages will be repaired and the mills running by to

Engineer Lon Hill, one of the oldest engineers on the Santa Fe road south of strengthening the party throughout the the city, states that the storm of last night was the worst he has ever experienced here in New Mexico. He pulled out of San Marcial on time, reached Socorro a few minutes late, but pulled into sary in order that the state may show Albuquerque about four hours late. He up in good form at the next presidential dared not run fast for fear that the storm would blow engine and all off the track. "It was the worst night," continued Mr. Hill, "that I have ever put in on abate for a minute." Freight Conductor Six notices of contest have been filed Hennessy, with his brakemen, McDonald during the conversation, and they corroborated what Mr. Hill stated. They fol-

and the sand blinding.

Conductor Oder came down from the porth on No. 1, which got in eight hours late, this morning. He states that the storm which the people of Alwaquerque are enjoying to-day is not a marker to what prevailed in Las Vegas vesterday and last night. It was simply immense. there and no one dared to poke their heads out of the doors, unless it was absolutely necessary. It is the worst sand storm he has ever tackled since his connection with the Santa Fe road. The tion. engine and coaches of his train swayed with a mighty motion at times.

At the wool and hide house of Thomas of venue. F. Keleher, on Railroad avenue, the wind i did great damage. The building was 103 feet long, but this morning only forty of the company's hospital. intensity at times, and the damage it feet was standing, the balance lying in a has wrought throughout the city will heap, and woof, hides and other articles probably reach up into thousands of in the building were mixed with broken tembers. A force of carpenters are at work closing up the portion standing. tions; window panes are broken in many The wind had a full sweep at the rear end of the building, and it succumbed in

William Farr called at this office and stated that his sausage factory on First displaced on street railways by electrice deep on the Mancos." street was standing on its head. A visit there revealed a complete wreck, the large boiler, weighing several tons was found twisted out of shape and other that state being adverse to railway inmachinery scattered, with the brick from the walls of the factory, all over the One of the plate glasses, fortunately yard. The smoke house, also of brick, not one of the largest, on the east side of is also a total wreck. The wreck here several days in Dalias and Fort the new Commercial club building, was is doubtless the most complete in the

ter and Leon B. Stern, on Ratiroad ave- broke through the roof, and one of Mr. one, fell out on the pavement with a Cristy's children narrowly escaped bed where the child was eleeping, and it is almost miraculous that the child es the conflagration.

The west side fence of the corral of throughout the city, especially in the ka & Santa Fe shops at Raton. suburbs, were leveled to the ground, and flying planks are even now seen skirting through the volumes of sand.

len was blown completely down by the

guie last night The new residence of M. Kellogg lost a chimney.

In old town the damage is also great; houses are blown down, fences are level

It is impossible to estimate the amount of damage incurred by the storm, which time of the storm, and many are blown of Albuquerque, the worst that has ever lodge, and they say that arrangements que is the pair for the scal of govern off. The roof on the Armory is partially occurred in the valley. The storm of last are being perfected for a grand time. night recalls the fierce storm that raged this city in February, 1881, when a trie light building lies all out of shape in store, adjoining W. L. Trimble & Co's. a heap on the ground. Other tin roofs livery stable, and for a time the whole town was threatened. There was no fire company then, but the organization of a of railroad in this territory. backet brigade prevented a serious con For unately no alarm of fire the wheel of the windmill at R. B. Successful Water Storage. Hon. Amando Chaves, territorial school superintendent, who has just returned to Sauta Fe after a trip through Sierra county, in an interview published in the New Mexican says: "Mr. Fost is at prestook a notion to move westward with the ent one of the proudest men in the counis about completed. Some time ago he in California. foundry was blown in and disorder reigns made up his mind to out do the rain at the foundry, and the stable of William makers and to secure a good supply of water for the beautiful valley which he city, was lifted from its foundation and has selected for his home. For this pure and the despatchers, who belong to the came down in small pieces. A brick kiln pose be organized all the citizens of Cuchillo for the purpose of constructing a reservoir, and the same is about com-The roof of the Atlantic & Pacific pleted. By this means the farmers of Cufrom the building, and the Albequerque section of country with all kinds of the corresponding season of 1800 91 has Foundry and Machine company suffers grain, fruits and vegetables. There are no signs of hard times in this place. The people are not waiting for something to turn up, but have gone to work in earn est to improve their condition, and are became loosened by the wind, and by it now reaping the benefits of their of forts.

Crowded Chicago.

Chicago, Dec. 11 - The circular distributed broadcast some time since by the Trade and Labor assembly, urging unemployed working men to stay away from Chicago, seems up to the present to have failed in its intended effect. Every new day seems to bring recruits to the already large army of men out of work, brewery, but the frame of C. W. Kunz's of both the far cast and the far west, as well as the south, being represented among the arrivals. The progress of construction on the World's Fair grounds, as well as the tremendous amount of building operations now going on, has furnished employment to hundreds if not thousands of the early arrivals, but nevertheless, the local labor market is overstocked, and is certain to remain so until the spring at least.

Minnesota Republicans. St. Paul. Dec. 11. The republican state central committee is in session here to-day. It has been called together thus early to consider a number of important questions among them that of nominating a United States senator at the nex state convention. Ways and means of state will also be considered. elections have demonstrated that the republicans are losing ground in this sec tion of the country, and the fact is recog nized that an active propaganda is neces

Cuntented Ments.

Washington, D. C., Dec. 11. The con tested elections committee of the house, ued Mr. Hill, "that I have ever put in on will have enough business on hand to the Santa Fe road, and the storm did not keep it employed for a considerable time. and all of them promise to occupy considerable time. At the same time the and Davidson, were standing near by number is eleven less than the last committee was called upon to consider. The states represented in the contest are New York, Pennsylvania, South Carolina and lowed the passenger train with extra Alabama. Three of the contestees were freight No. 339, and were emphatic in elected as republicans and the others as remarking that the storm was terriffic democrats.
